Instructor's manual *Research exercise: Search for given literature*
(exercise in presentation *Literature research*)

Search for the following titles in the Local Catalogue and/or in KonSearch. **Consider** first what kind of publication it is that you want to find. **Then carry out all steps of the search** until you have an electronic copy of the title or know where to find it in the library. If the title is not available in Konstanz, go through all the steps of the interlibrary loan short of placing the final order.
